☺**AET** is planned according to the development levels of the children. It provides an extension of the academic school year, reviewing and sharpening skills, with the goal of “*keep the children moving*” academically during the summer. For Kindergarten and up, Accelerated Reader and Math programming will continue in the summer. Ocean Treasures – 6th Grade will also be using *Fast ForWord*. *Fast ForWord* is a series of computer-delivered brain fitness exercises designed to improve language and reading skills by improving memory, attention and processing skills.

☺The summer classes will also regularly attend **the Julie Ann Dahmann Library** for story time; and, for the older children, the checking out of books

☺**Music & Motor** activities will also be incorporated into activity planning.

☺In July, we also plan to take the Bouncing Bears – 6th Grade to a Unity Theatre Production

☺As we continue to plan summer programming, other enrichment activities will be added.
